Website Care and Support Guide

Choose the support that matches how often your website changes. Your website build is paid separately. Both plans manage the routine technical work and give you a clear allowance for small updates.

Website Care

$49 per month or $279 prepaid for six months
Up to 30 minutes of updates each month in one combined batch.

What I take care of

I manage standard static-site hosting and deployments, check key links and contact forms monthly, and keep a source backup with rollback support. You send me the changes; I make them on your existing pages.

Examples of included updates

- Update your opening hours and replace a few supplied photos.
- Change a short service description, price, and an existing booking link.
- Swap an existing announcement for your seasonal offer using supplied wording.

These examples illustrate the kind of work covered. The combined work must fit within your monthly time allowance. Send one organized list with the exact wording, links, and ready-to-use images. I confirm if a request needs a separate quote before starting extra work.

Response and monthly limits

I respond within 3 business days to acknowledge your request and schedule it. This is a response target, not a promised finish date. Business days are Monday through Friday, excluding U.S. federal holidays. There is no round-the-clock support or guaranteed recovery time for outages.

Your 30-minute allowance resets each service month. Unused time does not roll over. Six-month prepayment keeps the same monthly allowance; it does not create a bank of project hours.

Work quoted separately

New pages, redesigns, new integrations, ecommerce administration, memberships, copywriting, and changes beyond the monthly allowance. Domain renewals, paid tools, and platform subscriptions are separate costs in your name. Complex stores and membership sites need their own support scope.

Payment and cancellation

Payment is due at the start of the service period. Monthly plans can end before the next billing period. Prepaid plans do not automatically renew. If you cancel six-month care, unused full months are refunded at $46.50 per month; the current service month is not refunded.

Your website remains yours

After full build payment, you own the agreed custom work, subject to third-party licenses. Your build includes source files and an account summary. If care ends, we coordinate handoff before managed hosting ends. An editing dashboard, new-host setup, platform conversion, and extended training are included only when separately agreed.

Website Support

$89 per month or $507 prepaid for six months
Up to 60 minutes of updates each month in up to two combined batches.

What I take care of

I manage standard static-site hosting and deployments, check key links and contact forms monthly, and keep a source backup with rollback support. You send me the changes; I make them on your existing pages.

Examples of included updates

- Refresh existing service prices early in the month, then change a seasonal announcement later.
- Replace supplied photos and edit several short blocks of existing wording.
- Update existing event dates and registration links in two scheduled batches.

These examples illustrate the kind of work covered. The combined work must fit within your monthly time allowance. Send one organized list with the exact wording, links, and ready-to-use images. I confirm if a request needs a separate quote before starting extra work.

Response and monthly limits

I respond within 2 business days to acknowledge your request and schedule it. This is a response target, not a promised finish date. Business days are Monday through Friday, excluding U.S. federal holidays. There is no round-the-clock support or guaranteed recovery time for outages.

Your 60-minute allowance resets each service month. Unused time does not roll over. Six-month prepayment keeps the same monthly allowance; it does not create a bank of project hours.

Work quoted separately
